

# Wordpress Protection Service

It's alarming how much activity is out there. If any of this were to get through it can corrupt the site as well as the hosting server. It can cause the server to crash and will put the site on Google's blacklist preventing anyone from viewing the site. I also offer a service to rebuild these sites and get them off the blacklist.

I now offer a monthly software update service. This will keep the Wordpress core and all plugins up to date and will help to prevent hacking and spamming. This includes installing a comprehensive set of anti-malware and spam protection plugins and running an anti-malware scan each month. (see below)

The cost is only \$30 per month for 3 months, a total of \$90. Pre-pay discount for 6 months is \$150. Pre-pay for 12 months is only \$250. Contact me by phone at 612-454-7933, mobile at 612-999-3332 or email at [brad@bradreek.com](mailto:brad@bradreek.com) for more information.

---

## **GOTMLS - Anti-Malware Security and Brute-Force Firewall**

This Anti-Malware scanner searches for Malware, Viruses, and other security threats and vulnerabilities on your server and it helps you fix them.

Features:

- Run a Complete Scan to automatically remove known security threats and backdoor scripts.
- Firewall block SoakSoak and other malware from exploiting Revolution Slider and other plugins from known vulnerabilities.
- Upgrade vulnerable versions of timthumb scripts.
- Download Definition Updates to protect against new threats.

Premium Features:

- Patch your wp-login and XMLRPC to block Brute-Force and DDoS attacks.
- Check the integrity of your WordPress Core files.
- Automatically download new Definition Updates when running a Complete Scan.

## **Wordfence Security**

Your WordPress website is secure with Wordfence. Powered by the constantly updated Threat Defense Feed, our Web Application Firewall stops you from getting hacked. Wordfence Scan leverages the same proprietary feed, alerting you quickly in the event your site is compromised. Our Live Traffic view gives you real-time visibility into traffic and hack attempts on your WordPress website. A deep set of additional tools round out the most complete WordPress security solution available. Reports are provided weekly to keep the core and plugins up to date.

## **Spam Protection by CleanTalk (search anti-spam)**

Max power, all-in-one, no Captcha, premium anti-spam plugin. No comment spam, no registration spam, no contact spam, protects any WordPress forms. Formerly Anti-Spam by CleanTalk.

## **Email Address Encoder**

A lightweight plugin to protect plain email addresses and mailto links from email-harvesting robots by encoding them into decimal and hexadecimal entities. Has effect on the posts, pages, comments, excerpts and text widgets. No UI, no shortcode, no JavaScript — just simple spam protection
